The Weight of Icelandic Fishermen

Svanlaug Skúladóttir
October 2012
University of Cádiz
Master of Maritime Health
Introduction

* Why is overweight increasing amongst fishermen
* The aim of this study
Research Questions

1. What is the weight of Icelandic fishermen.
2. What is the Body Mass Index (BMI) of Icelandic fishermen.
3. Does age have effect on weight and BMI?
4. Do Icelandic fishermen see themselves as overweight – underweight or of the right weight?
5. Have Icelandic fishermen gained weight, lost weight or is their weight the same as 5 years ago?
6. How many Icelandic fishermen should not have their license to work on board fishing ships due to weight problems?
Data Collection

- Information sent to fishing ships
- Data gathered on board and in health examinations
- Voluntary participation
- Data gathered from August to October 2012
The undersigned is a nurse at Akkilles slf. a company that is responsible for health care of fishermen. I am also a student in Master of Maritime Health. A part of my studies is to perform a research connected with health issues of seafarers. I have decided to look at the weight of Icelandic fishermen. No information regarding name, cpr., position, ship or company will be used. Participation is voluntary.

If you are ready to help me please, fill out the questionnaire and then give it to the nurse.

**Questionnaire**

<table>
<thead>
<tr>
<th>Height</th>
<th>kg</th>
</tr>
</thead>
<tbody>
<tr>
<td>Weight</td>
<td>cm</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Age</th>
<th>years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sex</td>
<td>male ( ) female ( )</td>
</tr>
</tbody>
</table>

I see myself as: (mark X were appropriate)

- Underweight
- Right weight
- Overweight

For the last 5 years I have been

- Gaining weight
- Same weight
- Loosing weight
Weight

* Overweight and Obesity increases the risk of certain diseases
* Body Mass Index (BMI): weight in kilograms divided by height in meters squared
  \[
  \frac{\text{kg}}{(m \times m)}
  \]
* Research on seafarers weight problems
Physical fitness and fishing as an occupation

- Dangerous occupation
- Importance of physical fitness
- Fishermen are aging
- Health promotion
Diet onboard

- Too many calories
- Blame it on the chef (cook)
The aim of the medical examination is to ensure that the seafarer being examined is medically fit to perform his or her routine duties at sea and is not suffering from any medical condition likely to be aggravated by service at sea, to render him or her unfit for service or to endanger the health of other persons on board.
Results

- 405 Questionnaires usable.
- All fishermen working on fishing ships of 500 GT or larger
- Sample is over 20% of the population (1900)
- Average age was 41.8 years (range: 18 – 69 years)

<table>
<thead>
<tr>
<th>Age (years)</th>
<th>18-30</th>
<th>31-40</th>
<th>41-50</th>
<th>51-60</th>
<th>61-70</th>
</tr>
</thead>
<tbody>
<tr>
<td>%</td>
<td>17.5</td>
<td>28.9</td>
<td>29.2</td>
<td>21.2</td>
<td>3.2</td>
</tr>
</tbody>
</table>
Average weight was 90.0 kg (range: 61.5 – 148.5)
Average BMI was 27.7 (range: 20.4 – 42.6)

<table>
<thead>
<tr>
<th>BMI</th>
<th>Definition</th>
<th>Number</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt; 18.5</td>
<td>Underweight</td>
<td>0</td>
<td>0</td>
</tr>
<tr>
<td>18.5-24.9</td>
<td>Normal</td>
<td>103</td>
<td>25.4</td>
</tr>
<tr>
<td>25.0-29.9</td>
<td>Overweight</td>
<td>206</td>
<td>50.9</td>

<td>Obese</td>
<td>72</td>
<td>17.8</td>
</tr>
<tr>
<td>&gt; 35</td>
<td>Obese</td>
<td>24</td>
<td>5.9</td>
</tr>
</tbody>
</table>
BMI distribution

- BMI < 18.5: 0%
- BMI 18.5-24.9: 6%
- BMI 25.0-29.9: 25%
- BMI 30.0-34.9: 18%
- BMI > 35: 51%

The majority of the population falls into the BMI range of 30.0-34.9 (51%).
Results cont.

What do you think of your own weight?

- 4% Underweight
- 50% Right weight
- 46% Overweight
What has happened to your weight in the last 5 years

**Results cont.**

- Gained weight: 34%
- Same weight: 57%
- Lost weight: 9%

Legend:
- Gained weight
- Same weight
- Lost weight
Discussion

* What to do
  * Only 25% are of optimal weight
  * 24% are in the obese group and 6% of these have BMI > 35
  * Diet onboard
  * Convenience stores onboard
  * Regular exercises
  * Health promotion
Thank you
